Participated in a team working on a problem statement in the Software Edition of Smart India Hackathon 2022. Attended the Grand Finale of the hackathon at Vignana Bharathi Institute of Technology in Hyderabad.

5 Star at HackerRank - Online Coding Tests and Technical Interviews

Attained a 5 star rating (and counting) in the Problem Solving category on HackerRank with more than 850 points.

290+ points at Geeks for Geeks - Online Competitive Coding Platform

At the Geeks for Geeks platform, I achieved a coding score of 270+ by solving more than 90 challenging coding challenges.

Coding Contests

Won 2 out of 3 Inter-College Coding competition.

PROJECTS

NoteApp

https://github.com/realsohel/OnlyNotes-

It is an online application for creating notes where you may store your notes in a database and edit, read, and remove them as needed. It is a full-stack application with a database connection created in MERN (Mongo, Express, React.js and Node.js), where I had completed all CRUD operations.

Portfolio Website

https://github.com/realsohel/Portfolio

It is my own portfolio website, where I have included information about myself, my projects, and how to get in touch with me. On it, viewers can also send me

their name, email, phone number, etc. to get in touch with me. It was created using the React.js, Tailwind CSS, and Firebase Database frameworks.

NewsApp

https://github.com/realsohel/LetsNews-Reactapp

https://github.com/realsohel/OnlyNews-mobileapp

It is a news app that lets you read the top headlines and most recent news from a given nation. Additionally, it offers news depending on areas, such as sports, business, technology, and science. It is designed for both mobile and websites using frameworks like React.js and Flutter respectively.

Text Editor

https://github.com/realsohel/Text-Editor

Text Editor is a text editing web application where you may type your content and carry out simple text editing tasks like changing the case of words, copying text, etc. Additionally, you can preview your writing to see how long it will take to read. It was created using Bootstrap and React.js.

Tic-Tac-Toe

https://github.com/realsohel/TICTACTOE

It is a Tic-Tac-Toe game web application that can be played between two players. It is made in basic HTML, CSS and Vanilla Javascript.

SIDE ACTIVITIES

Member of Web & App, SynTech-X '22 - '23

https://syntech-x.rdnational.ac.in/team

Was a member of a team of 5 people responsible for creating a website, app, and internal management panel for SynTech-X '22–'23, an intercollegiate computer science festival.

Core Committee, SynTech-X '22 - '23

Was a member of the core committee for the management and success of the intercollegiate computer science festival SynTech-X '22 - '23.

Event Head (CodeCombat), SynTech-X '22 - '23

Organized and hosted CodeCombat, an competitive programming event for SynTech-X '22 - '23, an inter-collegiate computer science festival.
